

Windshield Fairing

The van is going to get a fairing from Colorado Fairings for the roof rack as part of the trip home.

Gregg's granddaughter Kinsley helped pick the design. Yep. Kinsley liked this one. We have a reverse smile. The original plan called for us to stop off in Littleton, CO on the way home for installation. We were able to have the fairing shipped to Blue Springs and VDI did the install- at a premium price. It was nice having the fairing ready for from day one.
